## Waste less water, save our streams

Rare and beautiful chalk streams in our region, including the River [Local\_Name], are at risk. And that's all down to the huge demand for water. But with your help, we can ensure a sustainable future.

If we're all more careful with the kettle, think at the sink, and step out the shower sooner, together we can make a big difference.

## Claim your free water-saving gadgets

We're giving away devices that'll help you take saving water a step further, and save you money at the same time.

### Tap aerators

These simple devices mix water with air. Each fitted tap saves around 12 litres each day.

### Toilet cistern bag

Save up to two litres with every flush by dropping one of these bags into your cistern.

### Leak detection strips

A leaky loo can add up to £250 to your bills over a year. Spot leaks sooner with these handy strips.

## Choose your water-saving goals for the next six months

### 5 litres every day

by spending just one minute less in the shower.

### 14 litres every day

by getting a free 'save a flush' bag from [affinitywater.co.uk/save-water](http://affinitywater.co.uk/save-water)

### 50 litres every day

by using a water butt to collect water for the garden.
